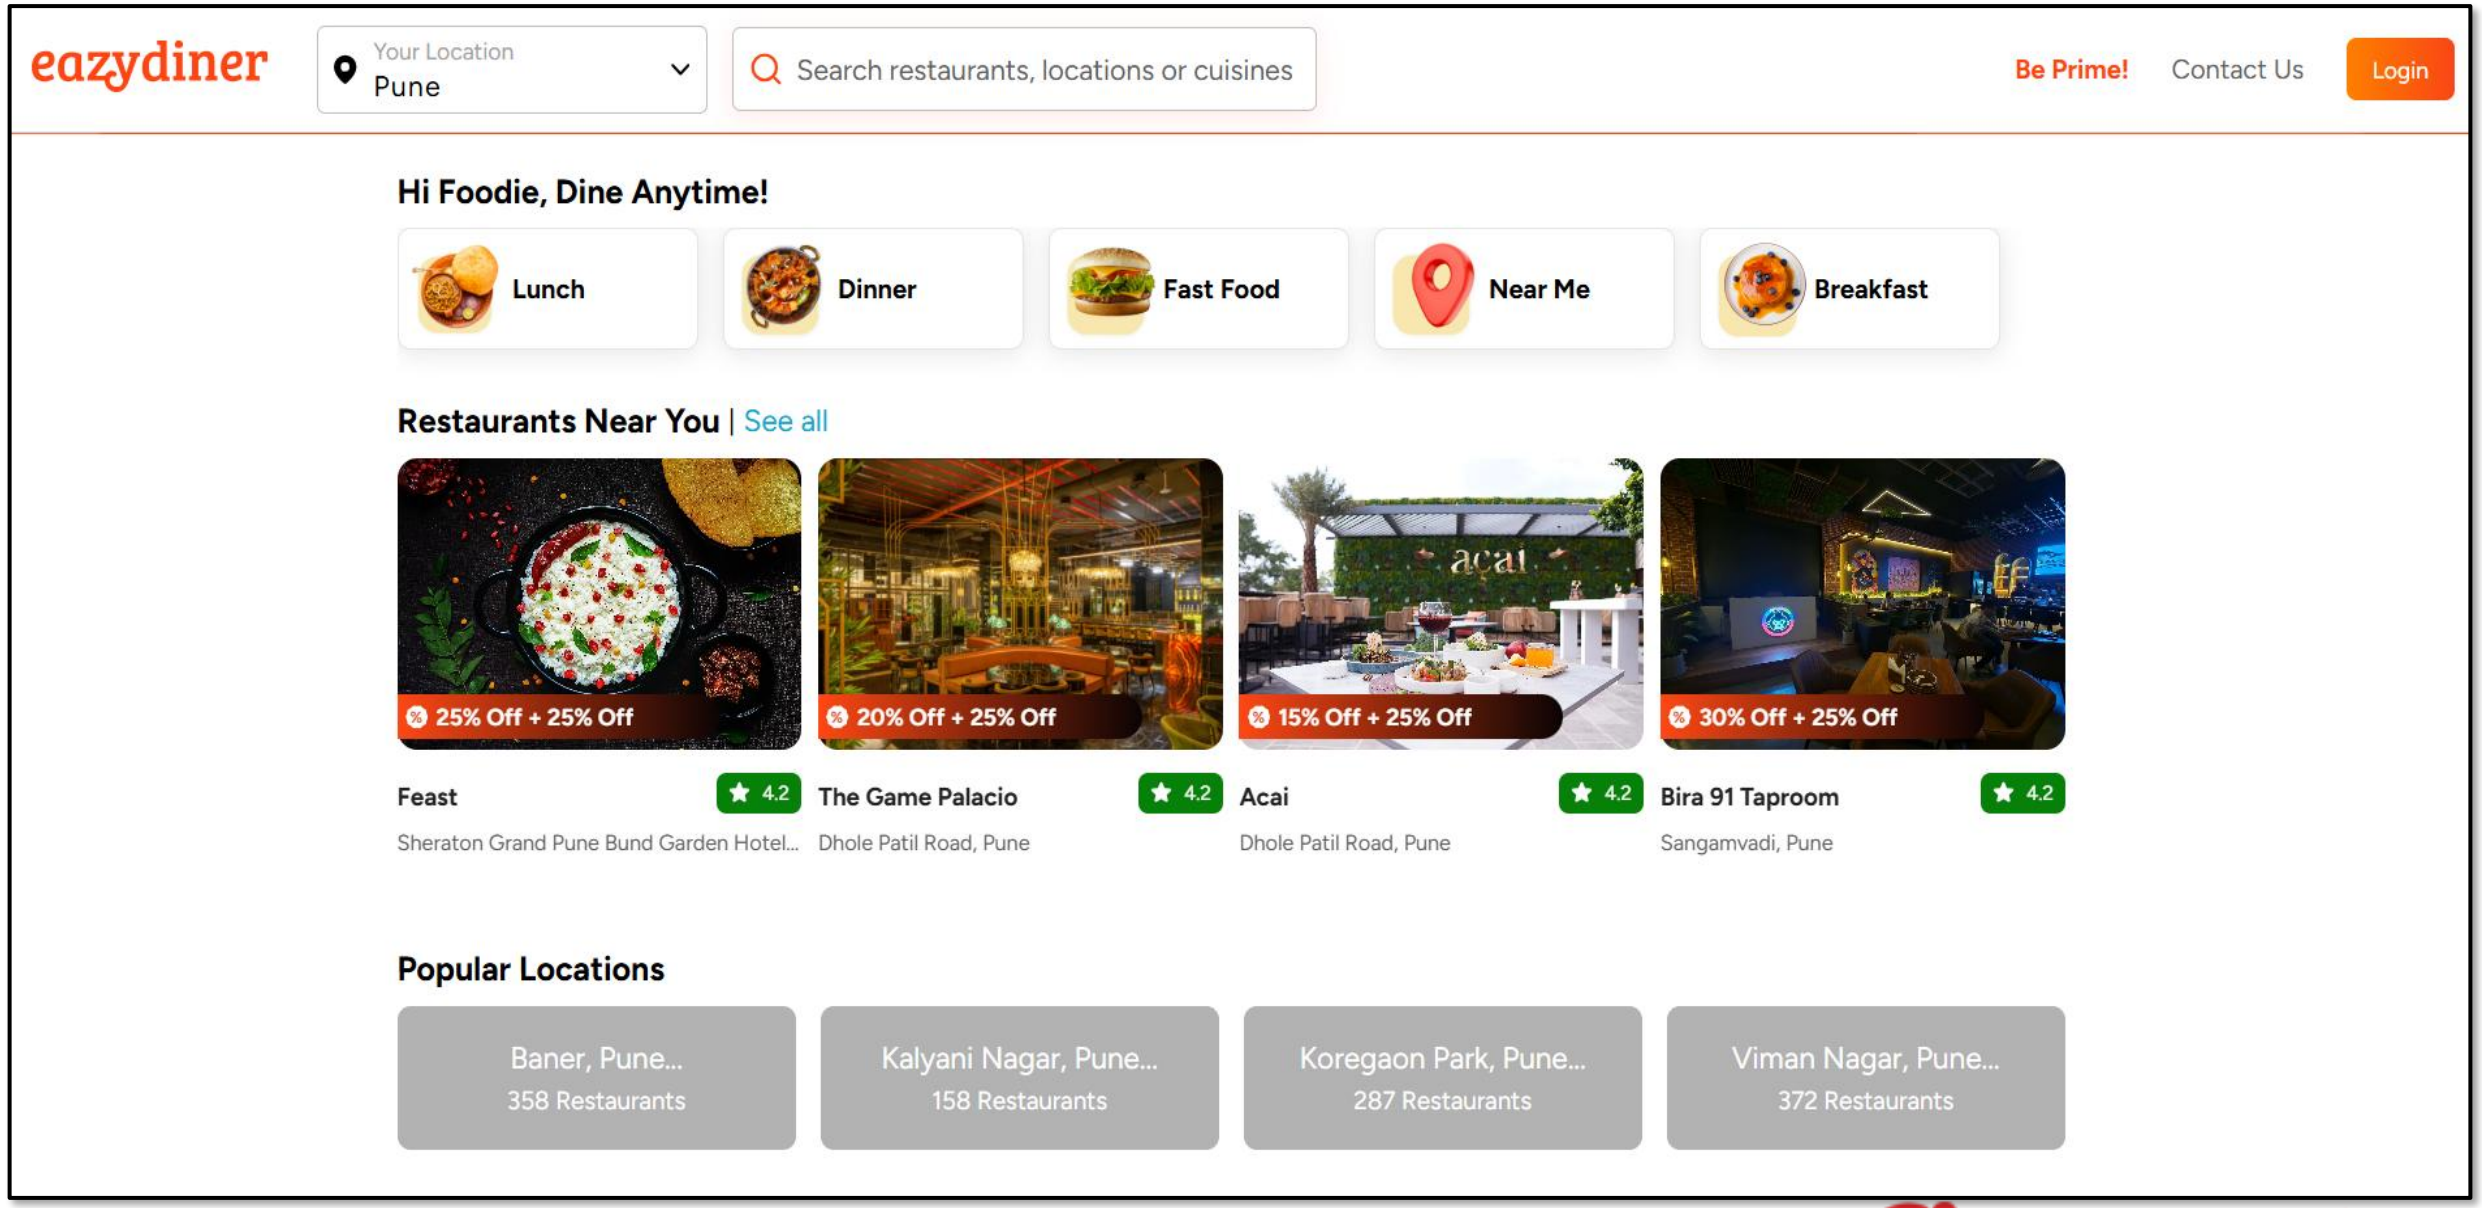
INNOMATICS RESEARCH LABS

Website:



INNOMATICS RESEARCH LABS

Objective of the Project :

- Collect restaurant data using web scraping.
- To clean and preprocess the dataset for accurate analysis.
- To perform Exploratory Data Analysis (EDA) to understand restaurant data patterns.
- To analyze factors such as ratings, prices, discounts, and locations.
- To visualize insights using Python libraries like Pandas, Matplotlib, and Seaborn.

Web scrapping process of the project :

Select the Website

↓

Send Request & Fetch Data

↓

Import Required Libraries

↓

Extract Restaurant Data

↓

Convert Data into DataFrame

↓

Clean, Save & Analyze Data

INNOMATICS
RESEARCH LABS

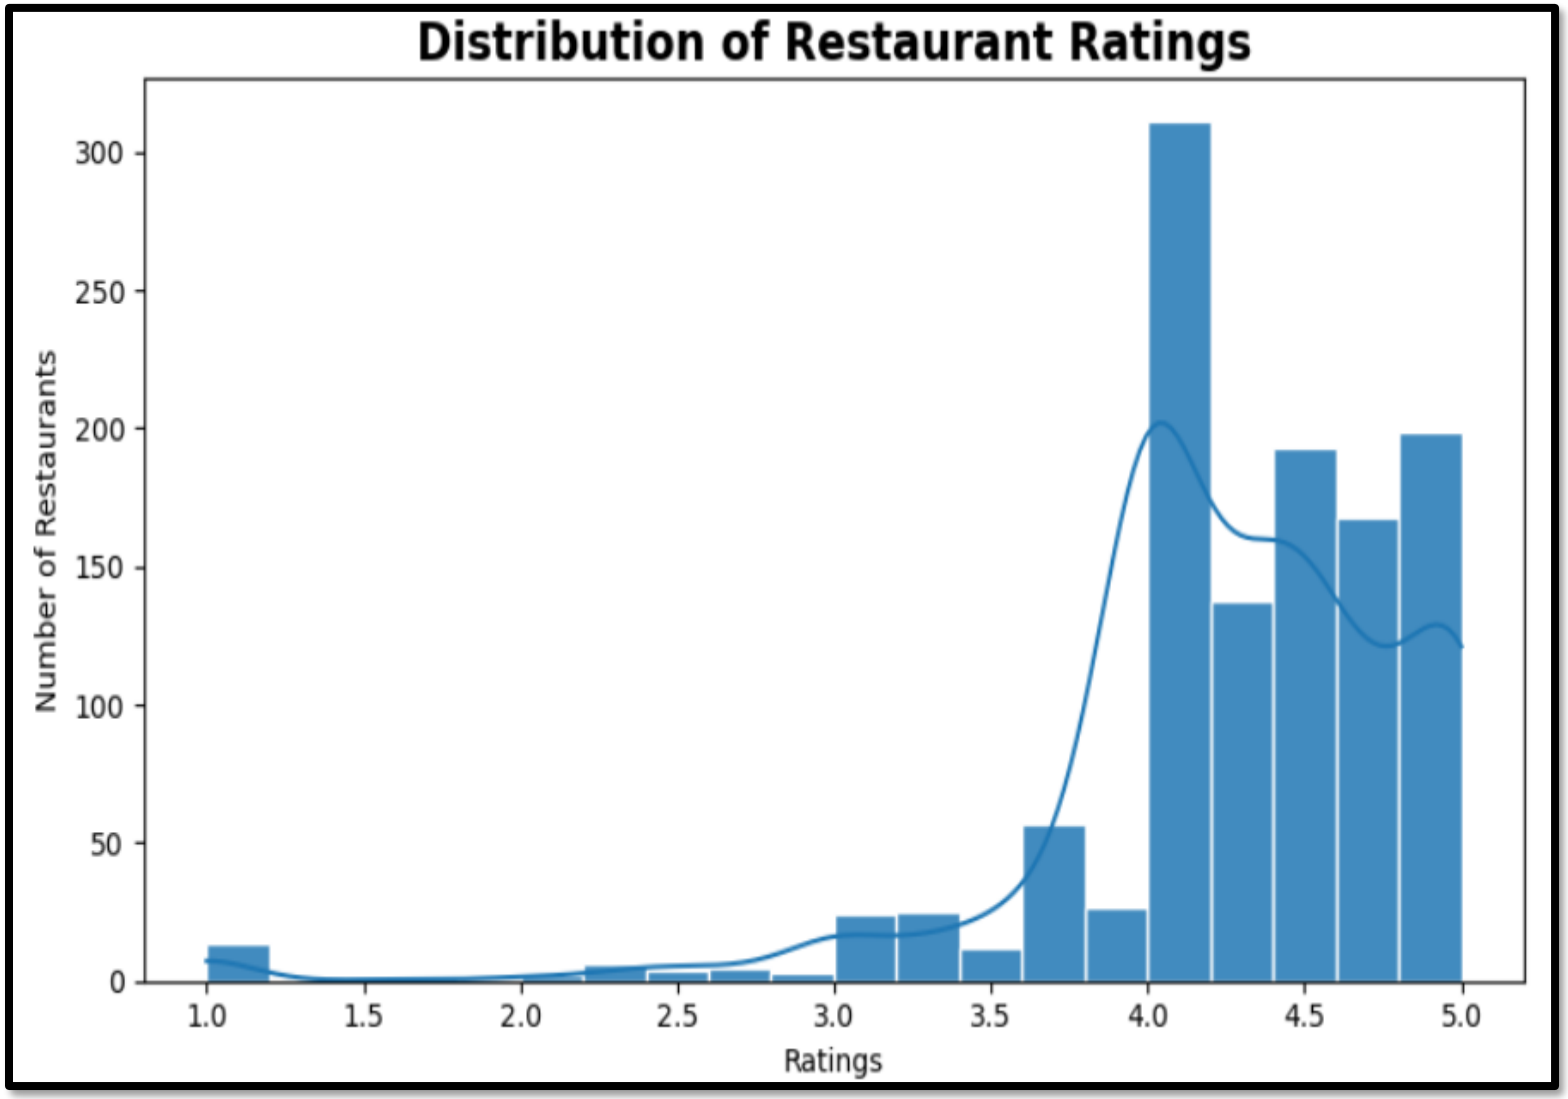
Before Cleaning the data :

	Restaurant Name	Ratings	Dishes	Area	Discount
0	The Sassy Spoon	4.5	Continental, Modern Indian, Asian, Desserts, E...	Koregaon Park, Pune	25% Off
1	Citrus Cafe	4.6	Multicuisine₹ 1600 for two approx.	Lemon Tree Premier, City Center, Pune	50% Off + 25% Off
2	Mazdana	4.5	Multicuisine₹ 1000 for two approx.	Camp Area, Pune	15% Off + 25% Off
3	Persian Darbar	4.6	Mughlai₹ 1500 for two approx.	Camp Area, Pune	25% Off :Payeazy
4	Acai	4.2	Multicuisine₹ 1500 for two approx.	Dhole Patil Road, Pune	30% Off + 25% Off

After Cleaning the data :

	Restaurant Name	Ratings	City	Location	Cuisine	Price	First_dis	Sec_dis	Discount_amount	Final_bill
0	Citrus Cafe	4.6	Pune	Lemon Tree Premier	Multicuisine	1600.0	0.50	0.25	1000.0	600.0
1	Mazdana	4.5	Pune	Camp Area	Multicuisine	1000.0	0.15	0.25	187.5	812.5
2	Acai	4.2	Pune	Dhole Patil Road	Multicuisine	1500.0	0.30	0.25	562.5	937.5
3	Mosaic	4.2	Pune	Crowne Plaza Pune City Centre	Multicuisine, All Day Dining	1500.0	0.20	0.25	375.0	1125.0
4	Evviva	3.9	Pune	Crowne Plaza Pune City Centre	Finger Food, Cocktail Menu	2500.0	0.50	0.25	1562.5	937.5

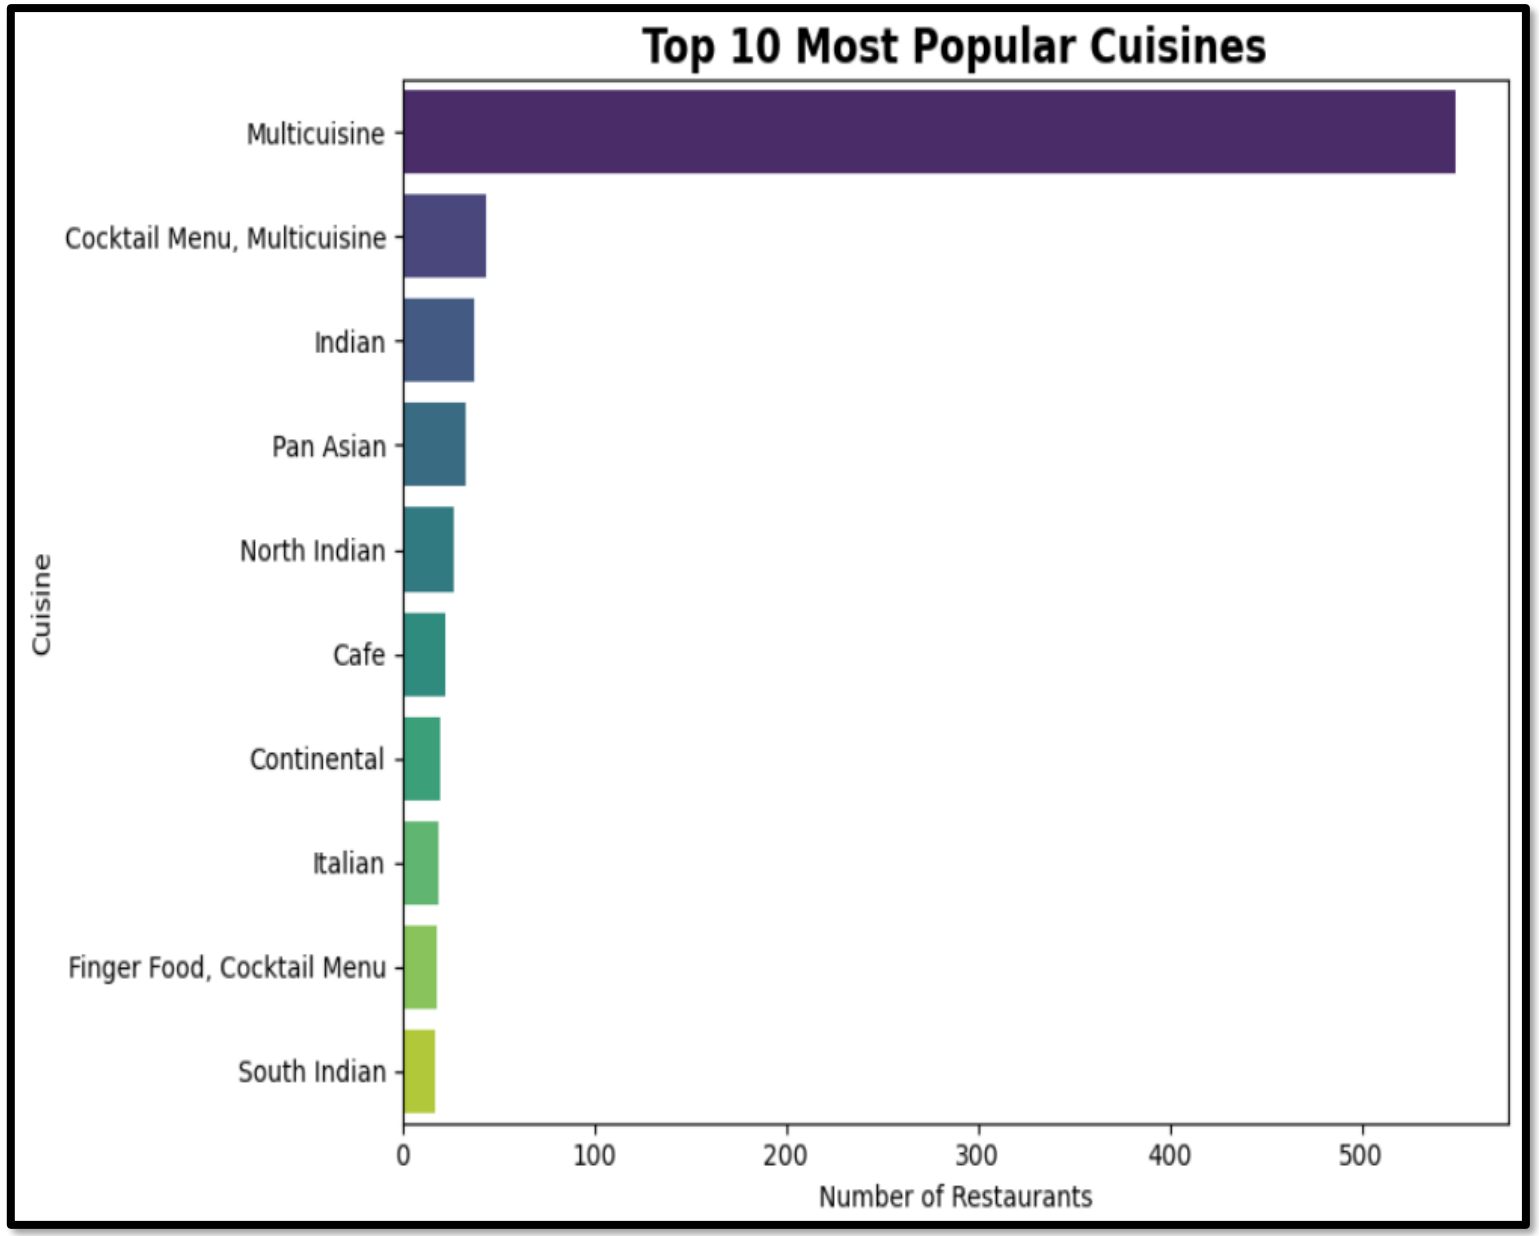
Shows overall rating pattern of restaurants.



- Most restaurants have ratings between 4.0 and 4.5.
- Very few restaurants have ratings below 3.0.
- Overall ratings are high, showing positive customer feedback.

INNOMATICS RESEARCH LABS

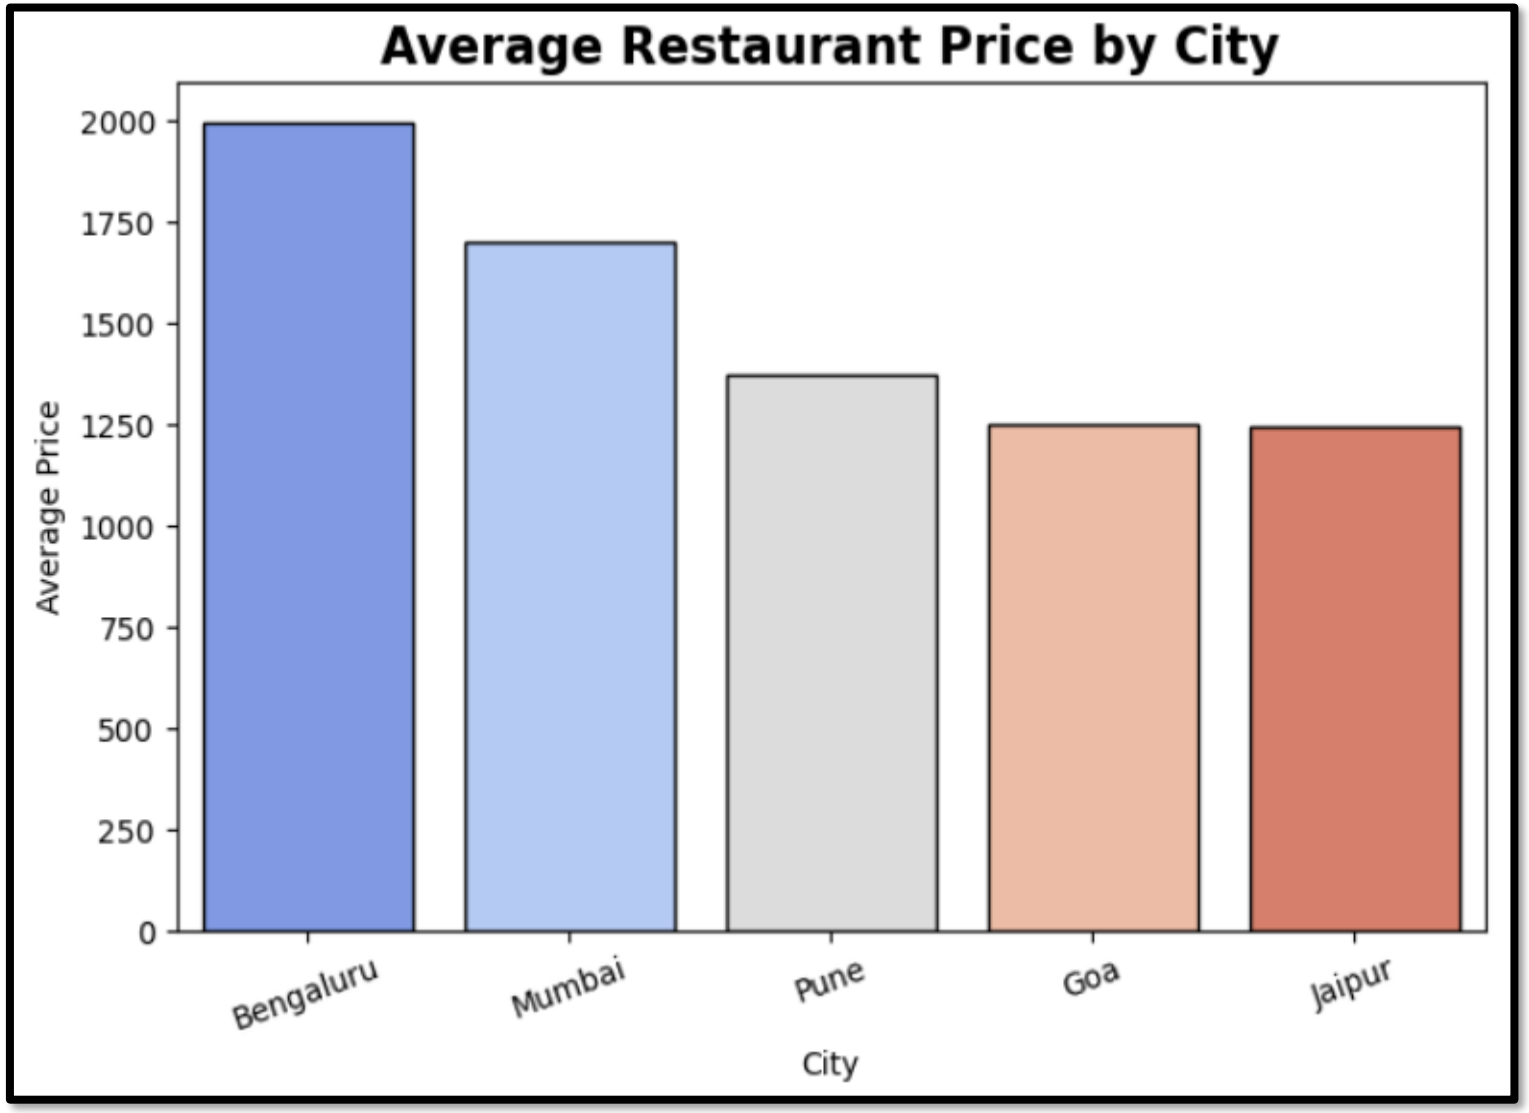
Top 10 Most Popular Cuisines in Restaurants



- Multicuisine restaurants are the most common among all cuisine types.
- Other cuisines like Indian, North Indian, and Pan Asian are also popular.
- South Indian and Italian restaurants are fewer compared to others.

INNOMATICS RESEARCH LABS

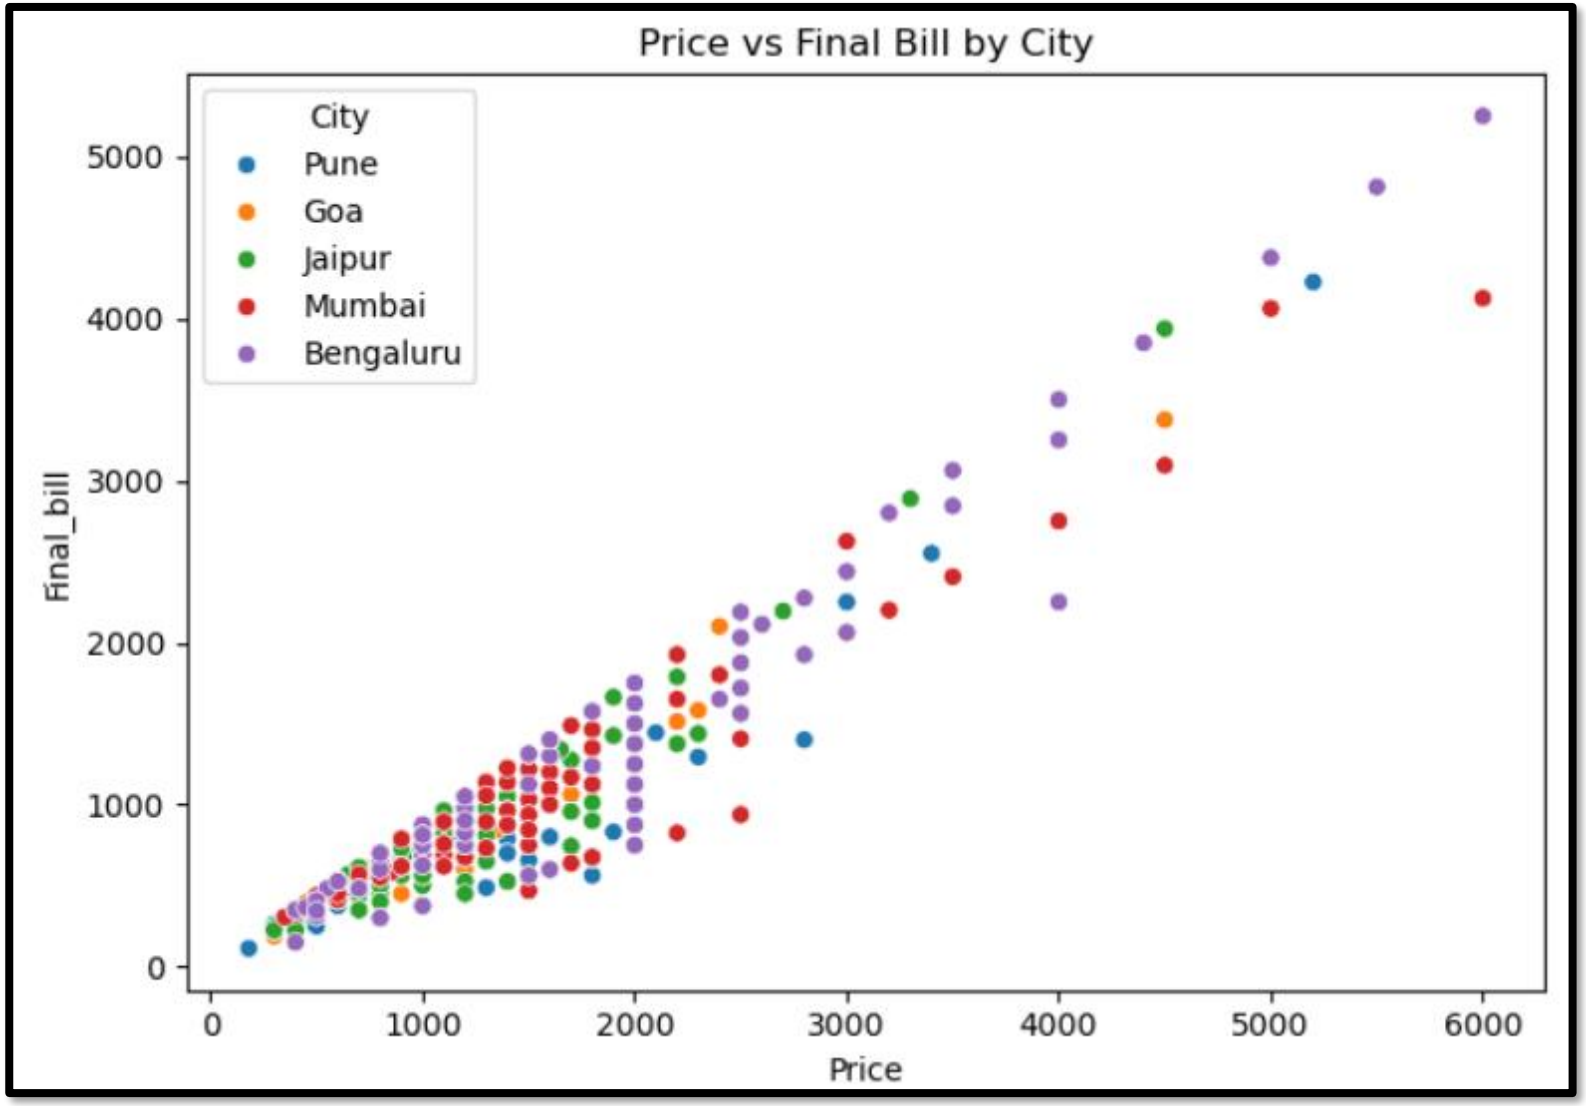
Comparison of Average Restaurant Prices by City



- Bengaluru has the highest average restaurant price.
- Mumbai also shows high dining costs.
- Pune, Goa, and Jaipur have comparatively lower average prices.

INNOMATICS RESEARCH LABS

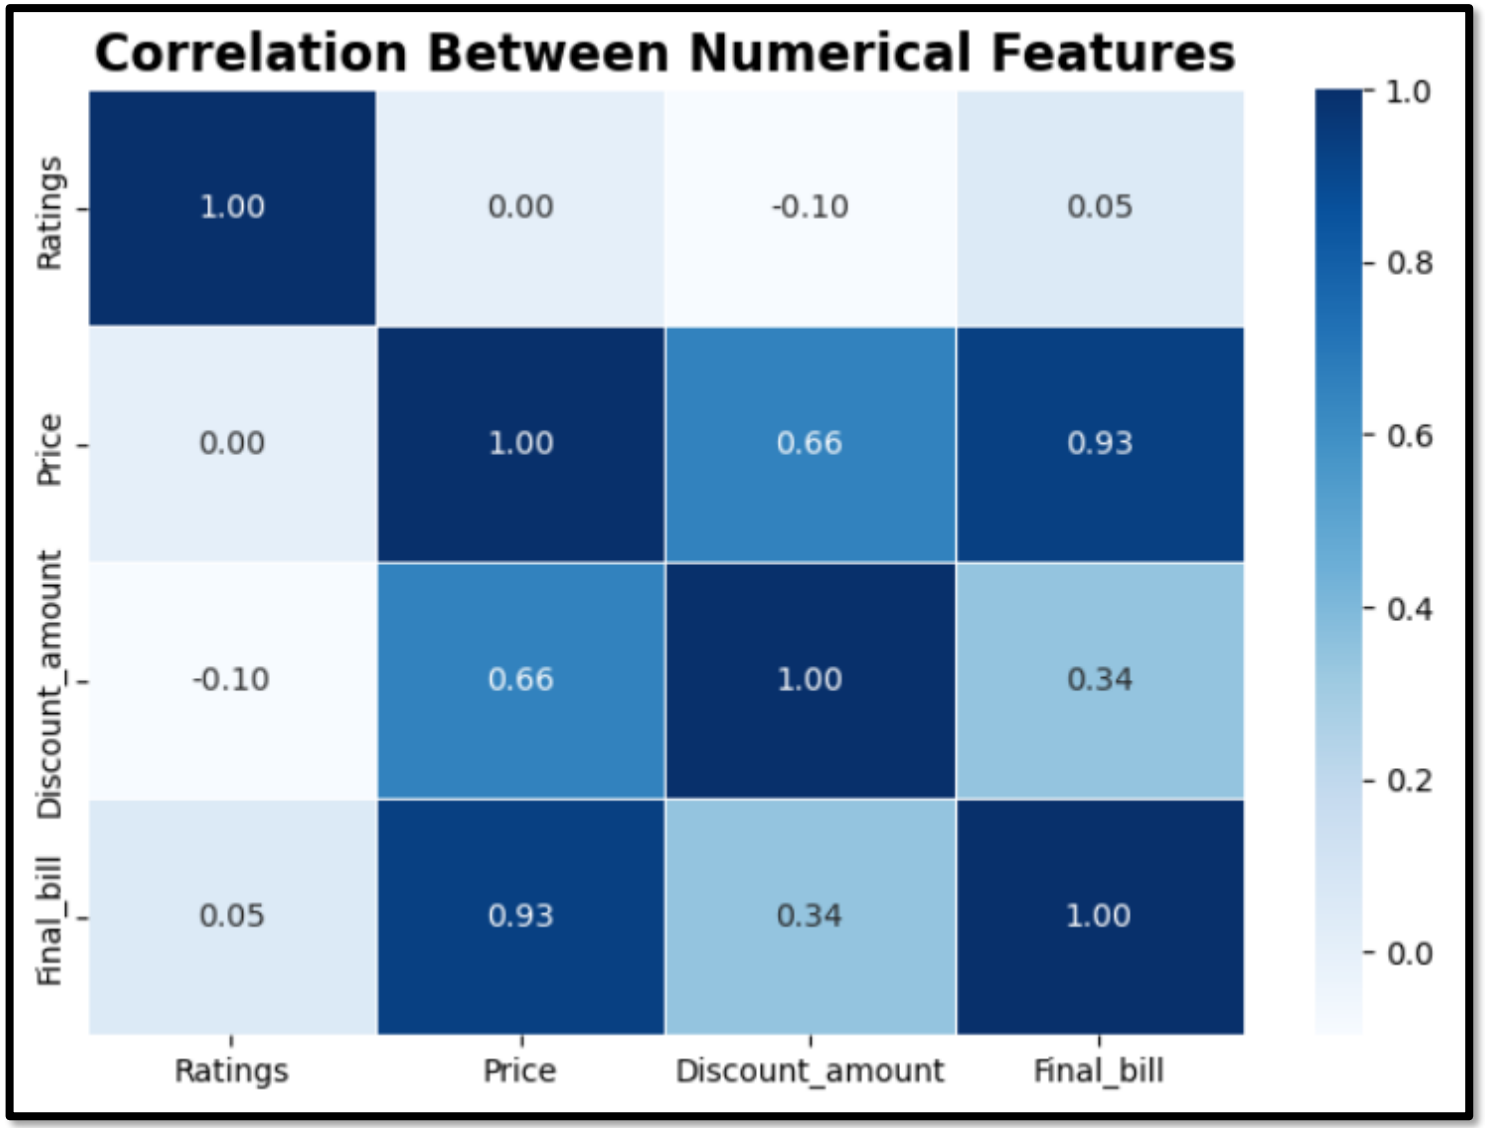
Relationship Between Price and Final Bill by City



- There is a positive relationship between price and final bill.
- Higher restaurant prices lead to higher final bills.
- This trend is consistent across all cities.

INNOMATICS RESEARCH LABS

Relationship Between Price and Final Bill by City



- Price and final bill have a strong positive coreelation.
- Discount amount moderately affects the final bill.
- Ratings show very little correlation with price and discounts.

INNOMATICS RESEARCH LABS

Conclusion

- The analysis provided valuable insights into restaurant trends, pricing, cuisines, and customer ratings using data from EazyDiner.
- Multicuisine restaurants are the most common, and most restaurants maintain high ratings between 4.0 and 4.5.
- Cities like Bengaluru and Mumbai show higher average restaurant prices compared to others.
- A strong relationship exists between restaurant price and final bill, indicating higher prices lead to higher bills.
- Overall, EDA helped uncover useful patterns and trends that can support better restaurant insights and decision-making.
